Mr Gary Baughman
Hazardous Waste Facilities Unit Leader
Colorado Department of Health
4300 Cherry Creek Drive South
Denver, Colorado 80222-1530

Gentlemen

There has been a change to the proposed final Operable Unit 2 (903 Pad, Mound, East Trenches) Technical Memorandum (TM) 8, the revised Bedrock Work Plan The proposed final TM 8, submitted for your approval May 21, 1993, (93-DOE-05210), states that EPA method 8010 would be used for the quick turnaround analytical sampling The contractor analytical laboratory would prefer to use EPA method 8260 The detection limits for both methods are similar We believe that the alternate method 8260 meets the requirements for the quick turnaround analytical samples Your staffs were notified of this change at the May 26, 1993, meeting and follow-up phone conversations on May 28, 1993

Approval of the final TM 8 would include approval of the use of EPA method 8260 If you have any questions, please contact Scott Grace of my staff at (303) 966-7199

Sincerely,

James K Hartman
Assistant Manager for Transition
and Environmental Management
